Venus II Water Birth Pool

This iconic mid-size, water birth pool was originally developed in mid-1980's with the help of mothers, midwives, obstetricians, manual handling and infection control experts.

Millions of women around the world have benefited from using this simple pool of water to have better experience of labour and birth.

The Venus II is a quantum leap forward taking the original model to new levels of safety, value and performance.

Active Birth Pools Page 15

Venus II Water Birth Pool

Intelligently designed to allow mothers to move naturally and instinctively to find the most beneficial positions

Purpose designed drainage with pop-up waste and rim-mounted control The distinctive keyhole shape channel in the back rim protects mothers from hitting their heads on the spout

Coul.

Multi-Colour LED Lighting and Bluetooth Sound enable mothers to control the ambiance of the room Recessed hand grips give mothers support in upright positions and help make squatting easier

Optimum space and depth encourage mothers to

move freely and gain

maximum benefit from

immersion in water

The bull-nose shape rim gives mothers a firm handhold to grab onto from anywhere in the pool

Safe, practical options for emergency evacuations with or without portable hoists

The Labour Support
Seat has a distinctive
groove down the middle
which allows the
coccyx to float freely
and not impinge the
birth canal

Extra-wide rim and step unit make it simple and safe for mothers to get in and out of the pool Mothers are actively supported as they move around the pool to find the most comfortable positions

The highly polished surface is ultra-smooth, less slippery, tactile and warm to the touch

The ultra-hard surface is less slippery and highly resistant to bacteria and chemicals

The Skirting Panel hugs the pool to create space under the rim for midwives to work closely in comfort

Seamless one-piece fabrication in Ficore composite makes it easier to clean and denies bacteria the environment they need to propagate
